Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims are rejected under 35 U.S.C. 103(a) as being unpatentable over Bunker (WO 98/ 26191) in view of Murata et al (U. S. Patent no. 5,826,683).

Bunker discloses all the limitations of the claims except for the use of an electric actuator. Murata et al teaches the use of an electric actuator in a disc brake setup. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use an electric actuator as taught by Murata in the system of Bunker in order to eliminate the need for hydraulic lines, improve performance due to elimination of pressure delay.
